FOR THE PLANET

We drive progress – and that also means taking responsibility: for people, for the environment, and for our products and how they are made.

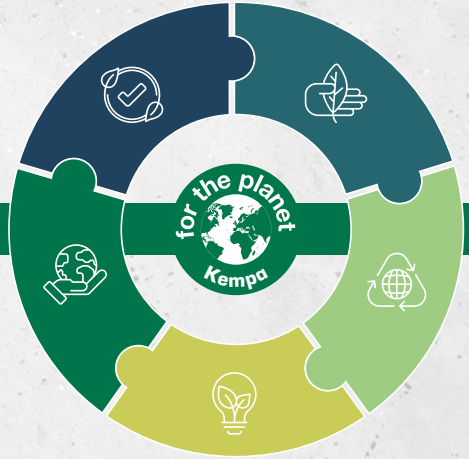

We place great importance on fair treatment of our employees, suppliers, customers, and everyone involved in our production and supply chain, in line with BSCI (amfori) social standards.

As a designer and manufacturer of sporting goods, we embrace the challenge of advancing sustainable change and reducing our environmental footprint step by step.

That's why we align with the United Nations Sustainable Development Goals (SDGs) and use the UN Global Compact and the OECD Guidelines for Multi-national Enterprises as our compass.

In the interest of better readability, we refrain from using both the masculine and other forms in the absence of gender-NEWtral wording.
The chosen masculine formulations therefore apply without restriction
to the other genders as well.

Our main catalogues are produced using an energy-efficient LED printing solution and are environmentally friendly, as they can be easily recycled. The innovative ink series enables the printing inks to be removed efficiently during the recycling process — an important contribution to a consistent circular economy.

For both cover and content, we rely on high-quality, sustainable premium papers: Magno Natural (cover) and arto® satin (content). Both come from responsibly managed, sustainable sources, are fully recyclable, and are manufactured in facilities with ISO-certified quality and environmental management systems.

SYNERGY SPIN

PWR GRIP material with **HIGH GRIP** line structure for ultimate grip and excellent ball control.

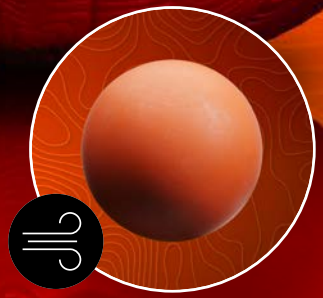

The innovative 'invisible seams' production process improves roundness and guarantees maximum dimensional stability.
Combined with revolutionary grip thanks to additional X2 foam and textile lamination, this handball technology sets new standards.

Multi-layered X2 lamination increases the rebound and softness of the ball.

textile lamination provides excellent roundness and supports the stability and robustness.

The latex bladder with textile lamination stops over inflation while minimising air loss.

BALL-REFINEMENT

In the interest of better readability, we refrain from using both the masculine and other forms in the absence of gender-NEWtral wording. The chosen masculine formulations therefore apply without restriction to the other genders as well.

Our main catalogues are produced using an energy-efficient LED printing solution and are environmentally friendly, as they can be easily recycled. The innovative ink series enables the printing inks to be removed efficiently during the recycling process — an important contribution to a consistent circular economy.

For both cover and content, we rely on high-quality, sustainable premium papers: Magno Natural (cover) and arto® satin (content). Both come from responsibly managed, sustainable sources, are fully recyclable, and are manufactured in facilities with ISO-certified quality and environmental management systems.
